- Coarse aluminium oxide grain grinds easily through steel and inox
- Hard grade wheel lasts longer, more use from one wheel
- Free of iron, sulphur and chlorine so does not contaminate the workpiece

- 4mm and 4,5mm wheel thickness means use at 90° and 45° for grinding standard and hard to access areas, saving time on wheel changes
- A slightly softer grade hardness makes this wheel ideal for use on a number of metals, a great all round wheel
- Free of iron, sulphur and chlorine so does not contaminate the workpiece

- Medium hardness wheel for good grinding performance on steel and inox
- Free of iron, sulphur and chlorine so does not contaminate the workpiece
